

**THE ROAD TO
COMPLIANCE
IS COMPLEX,**

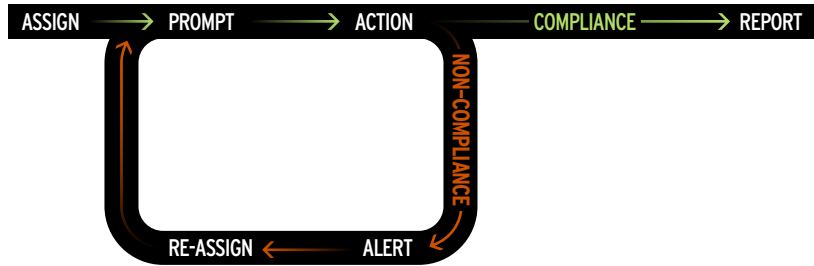

**EXTRATEXTUAL
WILL SHOW YOU
THE WAY.**

Complex laws and regulations
policed by cameras, speed detectors
and traffic lights govern our roads.
Break the road laws and
the consequences are dire.

It is the same with compliance, which is why you need the ExtraTextual eCompliance solution to keep things on track. This web-based compliance and risk management tool reduces risk and enables the development of a robust compliance culture, sending out crucial messages of active governance.

Plus it generates greater customer loyalty, lowers capital costs and hastens project approval times.

EXTRATEXTUAL eCOMPLIANCE MANAGEMENT PROCESS

YOUR ROADMAP TO COMPLIANCE

ExtraTextual is your roadmap through the complex web of compliance in our heavily regulated corporate environment.

Very simply this is how it works:

Specific requirements and tasks are clearly assigned to individuals who will receive an email prompting them to upcoming tasks and actions they must perform. All actions arising from these tasks are recorded and their progress is tracked and monitored. If at any stage a task is not done, the job is re-assigned until the action is completed.

Being able to record all compliance activity with ExtraTextual gives compliance managers a strategic reporting tool. It allows for the tracking of any changes in compliance requirements, it monitors departments not complying and creates a clear and concise roadmap of responsibility. Plus it frees management to concentrate on company strategy and other value-added activities like efficiency and cost reduction.

ExtraTextual is fully secure so only those with security clearance can access it. It features different levels of access, security, login protocols and encryption.

DRIVING YOUR COMPLIANCE

ExtraTextual's principals have over 35 years experience in funds management, IT and data management. They know the difficulties of compliance and the importance of sticking to the road laws. With this in mind they have created a solution that centralises all this activity in an easy, concise manner.

Think of it as your company's compliance engine that never stops running.

STAYING ON THE RIGHT ROAD

Traffic Management is a complex science that turns a cacophony of movement into a smooth harmony. The ExtraTextual eCompliance solution does the same with compliance. It takes the hassle and stress out of the process. Plus by embedding a strong compliance culture into your day-to-day operations, it protects you against reputational damage.

The ExtraTextual eCompliance solution improves efficiency, effectiveness and is highly adaptable to ongoing legislative reform. And with all compliance and risk activity centralised on a web platform, your road to compliance has never been smoother.

GLIDE OVER LEGISLATIVE SPEED HUMPS

ExtraTextual was developed by a team of experienced Fund Management experts, including one of Australia's premier Fund Management compliance advisors.

Once you're behind the wheel of this web-based compliance and risk management solution, you'll glide over legislative and regulatory speed humps.

To find out more about the smooth road to compliance, contact us for a free no-obligation demonstration today.
